

OKP Coin - Whitepaper

Overview

Token Name: OKP Coin

Symbol: OKP

Standard: BEP-20 (Binance Smart Chain)

Total Supply: 1,000,000,000 OKP

OKP Coin is a Brazilian meme token that blends humor , spiritual vision , and blockchain innovation . Created to be transparent and community-driven, OKP has built-in protections to prevent whale  manipulation and massive sell-offs , ensuring long-term sustainability and fairness.

Vision

Our mission is to deliver a meme token that is:

Culturally relevant  for both Brazilian and global communities

Secure and transparent , with verifiable code and anti-rugpull features

Community-guided , giving holders a voice and protection

Core Features

1. Anti-Whale Mechanism

To prevent whales from manipulating the market:

No transaction can exceed 2% of total supply (20,000,000 OKP).

2. Cooldown Period

A cooldown timer prevents bots or whales from making rapid transactions:

Each wallet must wait 5 minutes (300 seconds) between transactions.

This reduces volatility and protects small investors .

3. Marketing Tax

Each transaction may include a 5% tax (adjustable up to 10%) when enabled:

This fee goes directly to a marketing wallet , used for promotions, development, and community growth .

4. Burn Functionality

OKP holders can voluntarily burn tokens:

Burning reduces supply and may increase token value .

The function is fully public and transparent.

Tokenomics

Total Supply: 1,000,000,000 OKP

Max per transaction: 2% (20,000,000 OKP)

Cooldown: 5 minutes per wallet

Marketing Tax: 5% (adjustable by owner)

Security & Fairness

No hidden minting or blacklists 

Open-source code for verification 

Managed via Ownable (OpenZeppelin) ensuring changes only by the owner 

Designed to prevent common scams like rug pulls and massive dumps 

Roadmap

Q2 2025
